Special purpose Deep Throat Brinell Hardness Testing Machines,

Model: DT-3000-series

These special purpose **Deep Throat Brinell Hardness Testing Machines** are designed with hydraulic Power pack and control circuit for effortless testing of heavy duty jobs. The machines are suitable for production testing. These machines are designed to measure Brinell hardness of castings, forgings, other metals & alloys of all kinds, hard or soft, whether flat, round or irregular shape.

This machine conforms to IS: 2281/2005, ISO: 6506 Part II & BS: 240, ASTM E-10.

DT-3000 with Fix Table

Features:

- It is customized machine & special features can be added depending upon the customer requirement.
- Specially designed Power pack with precision control circuit for loading application
- Load selection is through Direction control valve (No dead weight system)
- Highly precision cylinder piston assembly to get better accuracy.
- Test height, Depth of Throat, piston stroke & table size can be modified depending upon customer's job height & width.
- Heavy duty jobs can be tested without efforts.
- Operation of the machine is automatic / manual mode.
- All electrical controls are mounted on the front for ease of operator. The same controls can provided on remote control.
- Inbuilt optical system, computerized model or Brinell Indentation Measuring system can be provided depending upon the customers requirement.
- Dwell time setting facility

DT-3000-ST

(Hydraulically operated Sliding Table

in X-X direction)

DT-3000-STM

(Manually operated sliding table in X-X

Direction & Y-Y direction)

Technical Parameters:

DT-3000-ST **DT-3000-STM** Description DT-3000 Test load for Brinell Test 750 kg, 1000 & 3000 kg Dia of ball indenter Standard 5 & 10 mm T C Ball Accuracy of test load ± 1% **600 mm Maximum test height Minimum test height 10 mm **300 mm Depth of Throat ** 300 mm & total test height is covered by providing additional Piston Stroke extension to piston. **Hydraulically operated ** Manually operated Table of 1000 mm piston sliding table in X-X ** Fix Table of size stroke approx. in x-x direction Direction of travel Length 1000 mm Length 1000 mm 1000 mm & Y-Y Size of table Width 800 mm Width 800 mm direction of travel 200 mm approx. Table size 1100 x 600 mm Load Capacity of table 2500 kg. Standard accessories Dia 10 & 5 mm TC Ball Indenter - 1 No. each Brinell Microscope 25X magnification – 1 NO. Wooden tool Box – 1 No. Allen key set - 1 No. Master Test Block 5/750 & 10/3000 - 1 No. each
